Summary

Recent graduate of Texas A&M University - San Antonio with a Bachelor's in Computer Information Systems. My interests are in software development and data analytics.

Coursework Highlights

* Predicted malware vulnerabilities for a machine by cleaning and optimizing raw data for a custom model to analyze. My responsibilities included writing custom python scripts to both parse and feed data.

* Optimized SEO for a fictional camera store to improve its online traffic, keyword search results, and revenue. My responsibilities included being the project leader, organizing meetings, determining which keywords to target, running the email campaign, and allocating the budget.

* Sent encrypted data to a custom remote server using asymmetric cryptography to replicate a custom public key infrastructure (pki). My responsibilities included creating a public and private key and sending it to a recipient to allow us access to a remote server.

Experience

Full Stack Developer Bootcamp at University of Texas, Austin
